MEMORANDUM FOR: Members of the EAC Sub-Committee on ELINT Training
SUBJECT: Estimates of Man, Money and Materials Required by the Agency ELINT Training Program

1. In consonance with the plan of action discussed at the last meeting of the EAC Sub-Committee on ELINT training which was subsequently approved by the EAC, we are now ready for the next step in this plan of action, namely, to investigate and prepare estimates of the man, money and material needed to achieve the previously approved ELINT training requirements. To commence this task it is requested that you refer to the attached list of agreed upon CIA ELINT Training Requirements and for each course listed, indicate the number of personnel per year you plan to send to each course. The component primarily interested in each course is asked to estimate what man, money and materials are required per year to establish each course. All components should specify any facilities presently on hand which could be applied to any individual course.

2. To permit a logical collation of the individual components estimates of man, money and materials needed, the attached outline is furnished as a guide to standardize our approach to the problem. Each course should appear on a separate page and all pertinent information of the type indicated should be provided by the component having prime responsibility for the course.

3. Upon receipt of this information from each component a meeting of the sub-committee will be called to discuss the collated results. It is hoped that this can be accomplished for a meeting of the sub-committee on 16 January 1959 at 1500.
